

PressOp and other Sensory Trick devices for Blepharospasm

Peter Bakalor

BEBRF Symposium

October 9, 2021

- PressOp
 - Developed in UK at Oxford University Hospitals
 - Funded by grant from Dystonia UK
 - Sensory trick device that attaches to glasses
- Ptosis Crutch Glasses
 - Help keep eyelids raised in case of ptosis
 - Work as a sensory trick device also to calm spasms
- Biker glasses strapped in place
 - Moisture chamber glasses to keep eyes dry
 - When tightly strapped in place, work as a sensory trick device

PressOp Device

Moisture chamber glasses
with strap

Ptosis crutch glasses

Where do you get them?

- PressOp
 - <https://www.pressop.co.uk>
 - GBP65 per, slight reduction if more ordered – plus shipping
 - Details from the BEBRF and in the next Newsletter
- Ptosis crutch glasses
 - Ask your local optician
 - Search the internet for ptosis crutch glasses for more options
- Moisture chamber glasses
 - Mine are from 7Eye by Panoptix
 - Other brands are available – check your local Harley store also.
